University/College – Major:

San Jose State University Bachelor of Science, Management Information Systems & Double Minor in Film, Spring 2027

Experience:

Sales Associate/Items Procurer @ The Food Mill May 2024-August 2024:
- Conducted regular inventory checks and kept accurate records to ensure shelves stayed well-stocked
- Worked closely with suppliers and upper management to coordinate product orders and deliveries on time
- Helped customers find what they needed and shared product knowledge to improve their shopping experience
- Built positive customer relationships through clear communication, contributing to stronger sales and repeat visits

Freshman Council of the National Society of Black Engineers/Black Alliance of Scientists and Engineers at San Jose State University, August 2023-May 2024:
- Recognized as a Certified Region VI Chapter of NSBE (National Society of Black Engineers)
- I played a key role on the BASE Freshman Council, helping to coordinate events and speaking at meetings to boost our organization's member engagement and community impact.
- I organized and executed several successful events, from year-round study sessions to workshops, by partnering with other STEM clubs on campus.
- I directly reached out to incoming freshmen and dorm residents to bring in new Black STEM majors and grow our presence on campus.

Boys and Girls Club Leader, Oakland CA, June 2021-August 2021, June 2023-August 2023
- Used a company-wide computer system to manage and log student check-ins and check-outs, ensuring all data was accurate and secure.
- Taught and tutored students in a range of subjects, including math, English, and science, using different methods to help them grasp complex concepts.
- Learned the fundamentals of business operations by seeing firsthand how a company runs, from day-to-day logistics to administrative tasks.

Project Experience:

- ***Library Management System (Java) Sep 2024***
  - Developed a Java-based Library Management System that efficiently catalogs and manages a collection of books. The program provides users with a clear interface to access detailed information on each item, including author, page count, and unique ID.
