ACADEMIC PROJECTS

Visual Basic.Net Class Projects, De Anza, Cupertino, CA

January 2022 - March 2022

- Developed a depreciation calculator displaying an item's yearly depreciated value using straight-line or double-declining balance method; displays 3 essential points: beginning balance, amount depreciated by, final amount after depreciation.
- Developed a "game of life" program displaying a different generation of individuals depending on surrounding spaces in checker display. If 1 individual is nearby 2 or 3 other neighbors, it survives. Any more or less, it dies next generation.

LEADERSHIP EXPERIENCE

Historian / Publicist, Mabuhay Bayanihan Club, San Jose, CA

August 2019 - June 2020

- Promoted upcoming events and daily club activities on Instagram and Facebook
- Created music mixes for several dance practices and 3 main school performances
- Uploaded and edited multiple YouTube videos of dance performances and other behind-the-scenes content; garnered over 10k+ views for 2019-2020 school year

OTHER EXPERIENCE

Sound Designer, Legacy Archive Foundation, Irvine, CA

July 2022 - Present

- Collaborating with 3+ other peers to preserve insightful stories and experiences of senior citizens through video documentaries
- Creating 2 different sound compositions to help establish brand identity in documentary-style videos
