## OBJECTIVE

Microscopist with 3+ years of industry knowledge. Worked together with a team to conduct research and deliver analytical data. Looking to leverage my experience and switch careers to an MIS related role.

## EXPERIENCE

### Quantumscape, San Jose — R&D SEM/FIB Technician

NOV 2020 - PRESENT (Electric Vehicle Startup)

Reading complicated request sheets to analyze battery components under the electron microscopes and deliver high quality images with exceptional turn-around time using various softwares such as Bruker and Aztec for elemental analysis.

Acknowledged to have highest turn-around-time.

### EAG Laboratories, Eurofins, San Jose — TEM Analyst

March 2020 - November 2020 (Service Lab)

Working in a fast paced environment with firm deadlines to deliver exceptional images, analytical data, and forming professional reports for abroad range of clients containing all scientific data.

## EDUCATION

### San Jose State University — Managing Information Systems, Business

August 2022 - Present

### San Joaquin Delta College

Associate to Transfer-Managing Information Systems, Business (2021-2022)

Certification - Electron Microscopy, Crystalline Materials (2018-2020)

## PROJECTS

### MISA (Managing Information Systems Association) — Member

August 2022 - Present

### Python — In progress

August 2022 - Present
