

Harshil Shahi

San Jose, California, 95112 | (949) 350 - 3889 | harshilshahiwk@gmail.com

Objective

A motivated and detail-oriented Management Information Systems major at San Jose State University, aiming to leverage a comprehensive educational background in technology and business. Seeking to apply analytical skills, financial knowledge, and technical acumen in a finance/tech role that demands strategic decision-making and innovative IT solutions.

Education

San Jose State University (San Jose, CA) May 2025 (anticipated)
B.S. in Management Information Systems

Work Experience

Web Developer: Nomad | Phoenix, Arizona | May 2022 - August 2022

- Led the end-to-end development of Nomad's e-commerce website, resulting in a user-friendly platform with increased customer engagement
- Utilized a tech stack comprising HTML, CSS, Sass, and ReactJS to create responsive and intuitive web pages, enhancing the user experience.

Relevant Knowledge Gained

- Gained insights into market structures, consumer behavior, and the impact of microeconomic variables on business decisions.
- Studied economic indicators, monetary policies, and their influence on the global business environment.
- Acquired foundational knowledge in financial reporting, budgeting, and cost analysis.
- Developed proficiency in business software and programming concepts, emphasizing automation and efficiency in business processes.
- Explored the role of information systems in organizations, focusing on leveraging technology for strategic advantage.
- Learned methodologies for analyzing business requirements and designing effective information systems solutions.
- Learned to manage data sources, ensuring data integrity
- Developed enhanced analytical data metrics using data-driven decision-making process and quantitative methods.

Skills:

Programming Languages: Java, JavaScript, C++, Python (with a focus on financial modeling and data analysis)

Web Development: Proficient in HTML, CSS, Sass, and ReactJS; experienced in creating user-centric and finance-focused web applications

Database Management: Basic understanding in SQL; experienced in managing financial data and their relationships
