CAREER OBJECTIVE

Currently a Management Information Systems major at San Jose State University. I am looking for an internship to learn and observe about business administration, marketing, and information systems fields of work.

EDUCATION

San Jose State University, CA

September 2018 – Present

Currently Pursuing a Bachelor's in Business Administration: Management Information Systems

- **GPA:** 3.02
- **Relevant courses completed:** Intro to Financial Accounting, Microeconomics, Macroeconomics, Elementary Statistics, Business Calculus, Public Speaking, Intro to Managerial Accounting, Legal Environment of Business, Composition Tools for Business
- **Relevant courses in progress:** Intro to Marketing, Networking and Data Communications, Fundamentals of Operation Management, Python for Non-Majors, Writing Workshop for Business Students

PROJECT

FINANCIAL STATEMENT PROJECT: JOHNSON AND JOHNSON

- Used 2019 and 2020 financial statements to understand the business
- Understand the risk factors of the business.
- Read and simplify management's discussion and analysis of results of operations and financial conditions.
- After going through the end of year report I discussed whether or not I would invest in the company.

EXPERIENCE

- **Blaze Pizza:** I worked at Blaze Pizza on Blossom Hill for eight months during my senior year of high school. It was my first job and it taught me about handling and dealing with customers. During my shifts I took orders because my manager and shift leads felt I was good at speaking to customers in a respectful and clear way. I also made pizzas, worked the register, and various cleaning tasks for closing.
- **Volunteer at Santa Clara Valley Medical Hospital:** I volunteered at the information desk and did odd jobs for different departments that needed me, like pushing wheelchairs and filing paperwork. My time at the hospital taught me how to communicate with patients, doctors, and administration from different backgrounds.
- **Marketing Intern at Contiq:** I was a marketing intern for six months managing emails, sales campaigns, and created instructional videos on how to use our product to its potential. This start-up is a SaaS tool for sellers that is used by companies like VMware and Deloitte. I learned much about the sales process from this experience.
