Summary

Resourceful and analytical Management Information Systems (MIS) student with expertise in business process management and technology integration. Proficient in data analysis, project management, and systems design, successfully enhancing operational efficiencies through collaborative projects. Committed to leveraging information technology for data-driven decision-making to support business objectives. Seeking a summer internship in 2026 or a part time job in the fall of 2025 to apply skills and contribute to impactful projects.

Skills

- Business process understanding
- Systems analysis
- Data analysis
- Fluent in Excel, PowerPoint, and Access
- Leadership

- Communication
- Beginner in Python
- Agile methodologies
- JIRA project management

Experience

Property Manager | Blue Trident C1 LLC - Fremont, California | 01/2025 - Current

- Oversees the daily operations of rental properties, including coordinating maintenance, collecting rent, handling tenant communications, and ensuring lease compliance.
- Manages budgets, tracks expenses, and handles the accounting, including rent collection, expense reporting, and financial recordkeeping.

Product Manager Intern | GSPANN - Milpitas, California | 06/2025 - 08/2025

- Defined epics and user stories in JIRA to support product development initiatives, with a focus on improving user workflows and internal tooling.
- Designed and scoped a UX Analytics Dashboard to visualize internal metrics, team activity, and content generation performance, enabling better monitoring of user engagement and compliance at scale.
- Developed a social media caption generator tailored to B2B and B2C marketing needs, enabling dynamic creation of optimized product descriptions across platforms like Instagram, X, and LinkedIn.
- Conducted in-depth research on agentic AI workflows, exploring frameworks like LangChain and LangGraph for multi-agent orchestration. Delivered a technical presentation on their potential integration to improve content pipeline modularity and automation.

Human Resources Intern | GSPANN Technologies - Milpitas, USA | 06/2022 - 08/2022

- My role involved using JIRA for different projects, as well as using Aperture to manage human resources.
- I was responsible for analyzing business needs and using technology solutions to enhance organizational processes.

Education

San Jose State University | Expected in 12/2026

Projects

Ticket Reservation System, June 2025 - Present, Developing a ticket reservation system that allows users to book tickets for transportation with real-time availability and secure payment options. The system features an intuitive user interface for easy booking, seat selection, and pricing management. It also includes an admin dashboard for managing events and generating reports, customer support integration, and handles cancellations and refunds efficiently.

Certifications

- IBM certfications (coursera) - Tools for Data Science
- Google Certification (coursera) - Product Management (in progress)
