Dear Celestica,

I would like to take this opportunity to introduce myself. I would be pleased to offer my skills to Celestica.

Throughout my years as a student I have been very good at understanding technology and applying it in a way to make multiple tasks much easier. I am currently a Management Information Systems major, so I have experience in computers, data systems, excel, and more. I have also had experience in building PCs so I can help with software if needed.

I have two years of advertising experience from my previous work. I have helped my previous company with advertising. I provided ideas to help their product become more interesting and captivating when the audience saw the ads. I feel as if I can also provide ideas and creativity to help captivate students when we create posters and promotional ideas for the events.

I am confident I can bring a work ethic, drive, and time management skills necessary to fulfill my role as an assistant for the career center. I look forward to learning more about this opportunity and hope that you can get back to me as soon as possible.

Sincerely,

Simrat Jolly
