

Sainath Subramanian

Student at San Jose State University

Major: BSBA Management Information Systems

Career Interests: Application developer, Business systems analyst, Data analyst, Database administrator, IT Director, IT Manager, IT Project manager, IT Specialist, Network administrator, Network technician, System administrator, Systems analyst, Web designer, Web developer

Personal interests:

- Founder of 500 Apparel, a clothing company. I sell hoodies, shirts, and other clothing. (<https://500-apparel.myshopify.com>)
- Participated in a business club in high school called DECA. Won a business role play competition, and attended various career development conferences.

- Played basketball in high school.

Work Experience:

Worked at Marshalls as a cashier during Summer 2022. Had the opportunity to learn communication skills, since our performance was evaluated based on our ability to convince customers to sign up for our rewards program.

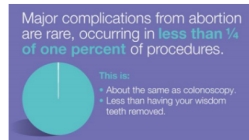

Sample of work:

Powerpoint I made in freshman year of college at SJSU. This was part of a presentation about the psychological effects of abortion laws towards women

Safety of abortion

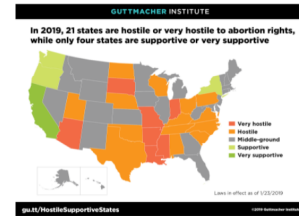

- Modern abortion procedures are very safe
- Pregnancy related complications are more likely than abortion complications
- No correlation to breast cancer

Bixby Center for Global Reproductive Health

Unjust abortion laws

- Laws vary state to state
- 6 week law
- Alabama "Abortion physicians are Class A Felons" Law
- Ohio "Fetal Heartbeat" Law

Guttmacher Institute

Impacts caused by unjust laws

- Rarely any women feel regret after having an abortion
- Studies show that when denied an abortion, women suffer from stress, anxiety, and depression
- Anti-abortion laws can cause women to be biologically linked to violent partners

Conclusion

- There are significant, detrimental psychological effects from abortion laws towards women.
- Stemmed from lies about pregnancy and abortions which are disproved by obstetricians and gynecologists
- It is unjust for male legislators and politicians to make policies about what women can choose to do with their bodies
- Women who desire an abortion should be able to get an abortion without restrictions and laws in the way. This will improve the health, safety, and well being of women.

Notable Courses :

High School

- Honors biology, Honors chemistry, AP physics, AP psychology, AP statistics, AP computer science
 - Challenged me academically as I had to comprehend new concepts and learn how to study new material faster.
- Web Design, Digital Video Arts Production
 - Allowed me to use technology in a creative way, while collaborating with a team.

College

- Business Statistics, Business Calculus
 - Further enhanced my math skills and improved my problem solving speed.
- Intro to Business Programming
 - Provided a strong foundation for my understanding of programming.
