OBJECTIVE

Currently, a student in Business MIS, seeking a challenging role as a Data Engineer Intern to contribute to the success of Atlassian. I am eager to apply my expertise in Python and drive for excellence in a dynamic work environment. Experienced in working in diverse businesses, and eager to collaborate with teams to optimize data strategies to enhance decision-making.

EXPERIENCE

Kumon, Berryessa

October 2022-Present

Center Helper

- Assist students in math and reading comprehension ensuring the students have a structured approach to problem-solving and analytical skills.
- Maintained progress reports of student's progress through data tracking their classwork and test scores
- Developed communication and leadership skills while guiding students to achieve academic excellence

Insane Ink

August 2021-June 2022

Sales Associate

- Managed client relationships, coordinated order pickup and deliveries
- Optimized financial operations for apparel sales
- Applied data analysis with other teams to track sales trends and improve inventory management efficiency
- Collaborated with team members to refine marketing strategies on social media to drive customer engagement.
